The three ad angles

how the creative talks

ANGLE 1 · RISK

"Raising capital? One securities misstep can sink the round."

Speaks to the founder's fear of getting the offering wrong. Drives the anxious, high intent click.

ANGLE 2 · AUTHORITY

Joseph on camera, explaining a Reg D pitfall in 60 seconds

Builds trust before any pitch. Carries the nurture and the retargeting.

ANGLE 3 · OFFER

"Take the 3 minute Private Capital Readiness Assessment."

Low friction, concrete next step. The direct response line across every channel.

What good looks like

B2B legal benchmarks

CHANNEL	EXPECTED CTR	EXPECTED CPC	COST / ASSESSMENT	COST / BOOKED CONSULT
Google Search	4–6%	\$8–20	\$40–90	\$150–400
LinkedIn	0.4–0.8%	\$8–15	\$70–140	\$250–500
Retargeting	0.8–1.5%	\$1–4	\$15–45	\$60–160

Legal keywords are among the most expensive in advertising, so we judge on **cost per booked consult**, never on clicks. Month one sets your real numbers. From there, every dollar moves toward the cheapest source of qualified consults, and those figures become the baseline the quarterly bonus is measured against.

8

How we run it, week by week

WINDOW	WHAT HAPPENS
Week 1–2	Launch approved campaigns, install conversion tracking, gather baseline. No major changes, we let data build.
Week 3–4	Cut losing keywords and audiences, shift budget to winners, add negatives, test new creative against controls.
Monthly	Report on qualified assessments, booked consults, and cost per consult. Recommend the next month's split for your approval.

9

What we need to launch

1.

Account setup

: Google Ads, LinkedIn Campaign Manager, Meta Business Manager, and a YouTube channel. We build inside them, you own and pay them.
2.

Tracking

for the ad spend, separate from what you pay BVN.
3.

Script

for the authority angle. We script, you record, we edit.
4.

Assets

before anything spends.

TWO THINGS TO CONFIRM WITH YOU

- **Which jurisdictions to target**, so Google and LinkedIn geo match where you can take clients.
- **Whether any ad accounts already exist**, so we connect rather than create.
