

ONE+ PICKLEBALL CLUB

GoHighLevel and Pod Play Centralization Proposal

A phased plan to centralize the club by integrating GoHighLevel with Pod Play. Pod Play keeps running your courts, scoreboards, replay, and DUPR. GoHighLevel becomes the central brain for your members, communication, marketing, and reporting.

Prepared by Benjamin Yson, BVN Official · July 2026

WHERE THINGS STAND TODAY

Starting from what you already have

I reviewed your current GoHighLevel account before writing this. The foundation is started but nothing is live yet. There are 3,287 contacts flowing in but they are unsegmented, two pipelines with no opportunities being tracked, eight workflows that are all still in draft and never published, one default form, and no email campaigns. Instagram messages are already landing in the inbox with no automation to answer them. The plan below turns that unfinished setup into a system that actually runs, then connects it to Pod Play and grows it.

THE PLAN

Five milestones, built step by step

MILESTONE 1

Review, cleanup, and foundation

Turn the unfinished account into a clean foundation and confirm how it will connect to Pod Play.

- ✓ Audit and organize the existing pipelines, workflows, and contacts
- ✓ Segment and tag the 3,287 contacts by member, lead, and language
- ✓ Finish and publish the workflows that were left in draft
- ✓ Confirm Pod Play API access and map the data that will sync

MILESTONE 2

Pod Play integration

Make Pod Play and GoHighLevel one connected system, with no manual data entry.

- ✓ Connect Pod Play and GoHighLevel by API or a bridge like Make
- ✓ Sync new members, bookings, and cancellations onto one central record
- ✓ Tag members by membership type and activity, then test end to end

MILESTONE 3**Communication and automation**

Turn member data into revenue with automated, bilingual communication across the whole lifecycle.

- ✓ Free intro class funnel, onboarding, and booking reminders
- ✓ Retention and win back automations for members who go quiet
- ✓ Automated review requests, all built in English and Spanish

MILESTONE 4**Marketing and channels**

Give the club a full marketing engine and get every messaging channel compliant and tested.

- ✓ Landing pages and funnels for memberships and events
- ✓ Youth program and wellness enrollment, plus a sponsors flow
- ✓ Connect social, complete A2P 10DLC, configure SMS and WhatsApp

MILESTONE 5**Central dashboard, training, and launch**

Bring every number into one view, hand the system to the team, and go live.

- ✓ Central dashboard pulling Pod Play and GoHighLevel stats
- ✓ Plain language SOPs and recorded team training
- ✓ Full testing across every channel, then go live and optimize

INVESTMENT**Milestone based, 40 / 30 / 30**

One flat build, paid across three milestone payments, so you only pay as value is delivered.

TOTAL PROJECT INVESTMENT

One time build, all five milestones

\$2,700 USD

40% \$1,080 PAYMENT 1 · To begin Milestones 1 and 2: the foundation cleanup and the Pod Play integration.	30% \$810 PAYMENT 2 · Halfway point Milestones 3 and 4: communication, automation, and the marketing engine.	30% \$810 PAYMENT 3 · On launch Milestone 5: the central dashboard, team training, testing, and go live.
--	---	---

Software subscriptions for GoHighLevel and Pod Play are billed to the club directly and are separate from this build fee.

NEXT STEPS

How we start

- 1 A short call to confirm the milestone order and what you want first.
- 2 Confirm Pod Play API access, which decides how clean the integration is.
- 3 Lock the scope and begin Milestone 1, then expand at your pace.
